

# ssp innovations LIFECYCLE WORK

SSP's Lifecycle Work (formerly WFM) is a web-based application that helps you estimate, prioritize, track, and report on all jobs within a single tool. Lifecycle Work is a highly configurable web solution and plugs into your existing graphic work design systems to unify your full capital work lifecycle. It helps you log work completed, prioritize your queue, track incoming work/service requests, and streamline the design and estimating process.

## WEB-BASED, CONFIGURABLE WORK REQUEST MANAGEMENT
