# Manage your critical assets.

Manage critical assets, plan smart routes, monitor rights-of-way, and track vegetation to comply with regulations. Do it all with the geographic confidence your utility expects and on which your customers rely. Turn valuable data you already have into meaningful maps that make finding the next right decision as easy as flipping a switch.

ArcGIS for Imagery  
Management

# Benefits

## Combine

Gather network and operations data in one place. Esri's platform to easily consolidate and manage your critical data.

[\[PDF\]](#)

## Understand

Analyze your data through a lens of location to understand the best manage your assets. [\[PDF\]](#)

## Operate

View operations in real time – including, weather data, crew locations, and asset conditions.

# Solutions

## ArcGIS for Desktop

Access maps. Improve vegetation management. Create right-of-way slope. Identify encroachments. Make your data tell you what you need to know. ArcGIS for Desktop works with your Lidar data, so you can too.

Learn more about ArcGIS for Desktop.

## ArcGIS for Image Extension for Server

Dynamic mosaicking lets you create images fast and access them quickly. Manage your imagery, understand your Lidar data, and process what you know on the fly. Extend your imagery to its full view.

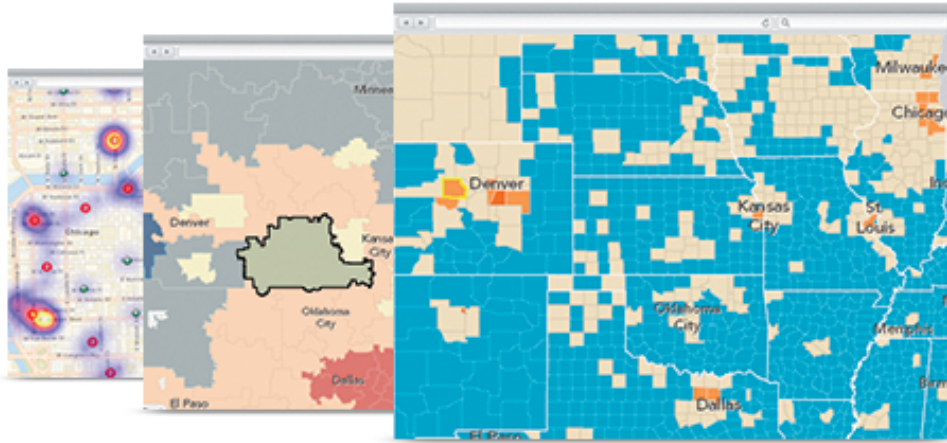

Learn more about ArcGIS for Image Extension for Server.

# ArcGIS Online

Share data across all your organization, from engineering to field operations to customer service. ArcGIS provides a platform for your organization to collaborate. Control who sees what by individual or groups.
