Subject: Announcing the Esri Water Utilities Meetup

Let Your Ideas Flow

Collaboration breeds good ideas. Join the Esri Water Utilities Meetup for invitations to monthly webinars and physical gatherings. Be the first to know how your peers are using existing tools to make gains in field operations, emergency response, asset management, customer service, and regulation compliance.

Join today to attend the October 15 free webinar, *"What is ArcGIS for Water Utilities?"* at 9:00 a.m. (PDT).

Matt Hirst from BlueReview shows how to cut cost and liability with a one-ticket locator and web tool. Esri staff break down best practice for compliance reporting, conservation improvements, customer information-sharing, and field operations.

Click "Join Us!" to reserve your virtual seat and receive exclusive invitations to more water GIS meetups.

It's all free. Is your schedule?
